APPROPRIATION LIMITATION ADJUSTMENTS 2013-2014

The provisions of Article III-B of the State Constitution specifically provide for "exclusions" to the Gann Appropriations Limit applicable to local governmental agencies. Section 9 of Article XIII-B provides as follows:

Appropriations subject to limitation for each entity of government shall not include:

- (a) Debt Service
- (b) Appropriations required for purposes of complying with mandates of the courts or the federal government which, without discretion, require an expenditure for additional services or which unavoidably make the providing of existing services more costly.
- (c) Qualified Capital Outlay.

This office has determined that the program listed below is a mandate imposed by the federal government that unavoidably makes the providing of existing services more costly.

Contributions for Social Security: In 1983, Congress amended the Social Security Act by barring public agency employers from terminating their previously voluntary participation in the social security system. In 1986 the United States Supreme Court ruled that the 1983 amendments precluded all public agency withdrawals after April 20, 1981. Therefore, social security costs since that time associated with the maintenance of existing services have been unavoidable.

2013-2014 Estimated social security contributions
funded by proceeds of taxes \$4,914,468
